**Q-2. Following is the scenario reported by the students of semester 3 in general. Read it carefully and answer the questions followed by its rationale. (Marks: 05)**

On way to our first day at FAST Lahore campus, we were happy with an ample amount of energy, and our bus driver was using the shift stick while driving (2,3). When the bus entered the campus, it was all decorated with warm welcome wishes for the new batch. We students were instructed to sit in the auditorium and our parents were seated in the library, which was reported to be highly equipped with latest facilities by them (1,5). The Director of the campus was called on the stage where he started delivering a speech in the auditorium, and everyone was listening to it with keen interest. Then Head of the department of our registered study program told us about the core courses which are mandatory to pass as a pre-requisite to learn advanced courses. After that, we visited the university campus and had an awesome lunch at a cafe with our families. Then the day came when our first class

was commenced, and all the workload accompanied by the course outlines was shared with us through google classroom. We were addressed with great courage and motivation to get this 4 year bachelor degree and finally, we are in the current semester learning and studying the core courses in combination with elective course.

Currently, we are giving our quiz of Psychology and trying to recall the slides, and the lectures delivered by our subject teacher to attempt and score it well. We are performing well in this quiz as we remember all the lecture content properly. Another factor may contribute to our learning if our teachers try their best to teach us in an easy and meaningful way by giving real-life examples and use of pictures to make it interesting.
